DOWN TO EARTH

ALL NATURAL FERTILIZERS

NET WT 5 LB (2.27 kg)
Nitrogen (N)
Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

Phosphorus (P)
Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

Potassium (K)
Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plant’s resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Kelp Meal or Langbeinite.

What is "N-P-K"?
Nitrogen (N) - Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

Phosphorus (P) - Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

Potassium (K) - Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plant’s resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Kelp Meal or Langbeinite.

Guaranteed Analysis

Total Nitrogen (N) 12.0%  Derived from: Dried Blood
1.0% Water Soluble Nitrogen
11.0% Water Insoluble Nitrogen
Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

Application Rates
3 cups ≈ 1 lb; ½ cup ≈ 2.5 oz; 1 tbsp ≈ 0.25 oz

Vegetable Gardens: To prepare new gardens, apply 2-3 lbs per 100 square foot and thoroughly mix into the top 3" of soil. For new transplants, add 1 tsp per hole, mix into soil and water in well. To feed established plants, side dress 1-2 tsp, depending on size of plant and desired growth rate, once each month during the growing season.

Outdoor Containers: For new plantings, add 1-2 tsp per gallon of soil and mix thoroughly. To feed established plants, lightly mix 1 tsp per gallon into the soil surface once each month during the growing season.

Use of a dust mask is recommended for application of any dry fertilizer product.
