Acid Mix is blended specially for acid soil loving plants like blueberries, rhododendrons, azaleas, hydrangeas, evergreen trees and shrubs, raspberries and other plants that thrive in low pH soil. To encourage lush flowers and fruit, apply Acid Mix in early spring for vegetative growth and again when blooms appear. Fall applications can help promote root growth and boost resistance to extreme winter temperatures.

GUARANTEED ANALYSIS

TOTAL NITROGEN (N)	4.0%
0.4% Water Soluble Nitrogen	
3.6% Water Insoluble Nitrogen	
AVAILABLE PHOSPHATE (P ₂ O ₅)	3.0%
SOLUBLE POTASH (K ₂ O)	6.0%

Approximate Conversions

2½ cups ≈ 1 lb

½ cup ≈ 3.2 oz

1 Tbsp ≈ 0.4 oz

APPLICATION RATES

Berries:

To prepare new gardens, apply 2.5-5 lbs per 100 linear feet and thoroughly mix into the top 3" of soil.

For new berry plants (1-2 years old), prepare transplant hole and mix ½ cup with the backfill soil. Use amended soil to fill in around the new plant and water in well.

To feed established berries, apply 1 cup per plant in early spring, mix into soil surface and water in well.

Repeat application when blooms appear and again in fall at half the recommended amount.

Containers:

For new plantings, add 1-2 Tbsp per gallon of soil and mix thoroughly OR add 5-10 lbs per cubic yard.

For established plants, lightly mix 1-2 Tbsp per gallon into the soil surface once each month during the growing season.

Vegetable Gardens & Flower Beds:

To prepare new gardens, apply 2.5-5 lbs per 100 square feet and thoroughly mix into the top 3" of soil.

For new transplants, add 1-2 Tbsp per hole, mix into soil, add transplant, fill in with soil and water in well.

To feed established plants, side dress 2-4 oz, depending on plant size and desired growth rate, once each month during the growing season.

Trees & Shrubs:

Spread 1 lb per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well.

For new trees, prepare transplant hole and mix 1-2 cups with the backfill soil. Use amended soil to fill in around the new tree and water in well.

Use of a dust mask is recommended for application of any dry fertilizer product.
