AZOMITE
 GRANULATED TRACE MINERALS
0-0-0.2

Net Wt. 50 lbs., 22.6 kg.

AZOMITE is a natural mineral product mined in central Utah. This unique deposit was formed when an ancient volcano erupted and its ash settled into a prehistoric seabed creating a complex mineral composition. AZOMITE can improve plant and root system growth, crop yields, and quality as well as re-mineralize nutrient depleted soils. Granulated AZOMITE is virtually dust-free and spreads easily on fields, garden soils and lawns or can be blended with other fertilizer materials as a trace mineral resource to help meet plant nutritional needs. It can be applied directly or in combination with composts, fertilizers, manures or soil inoculants.

GUARANTEED ANALYSIS	
SOLUBLE POTASH (K ₂ O)	0.2%
CALCIUM (Ca)	1.8%
MAGNESIUM (Mg)	0.5%
0.001% Water Soluble Magnesium	
SODIUM (Na)	0.1%

APPLICATION RATES

2.5 cups ≈ 1 lb; ¼ cup ≈ 1.5 oz; 1 Tbsp ≈ 0.4oz
Vegetable Gardens & Flower Beds: To prepare new gardens, apply 1-2 lbs per 10 square feet and thoroughly mix into the top 3" of garden soil in Spring or Fall. For new transplants, add 1 Tbsp per hole, mix into soil and water in well.
Containers: For new plantings, add 2-3 Tbsp per gallon of soil and mix thoroughly OR add 0.5-1 lb per cubic yard. For established plants, lightly mix 1 Tbsp per gallon into the soil surface every other month during the growing season.
Lawns: Apply 3-6 lbs per 1,000 square feet and water in well. Three to four applications per year are recommended and results may be enhanced if applied following aeration. For new lawns, apply 6 lbs per 1,000 square feet and mix into top 3" of soil before seeding or sodding.
Trees, Shrubs & Vines: Spread 1 lb per 2" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. For grapes, apply ½-1 lb to the soil around each plant and thoroughly mix into soil. For new trees, prepare transplant hole and mix 4-8 oz with the backfill soil. Use the amended soil to fill in around the new tree and water in well.
Row Crops/Acreage: Apply 75-150 lbs per acre initially, followed by annual maintenance applications of 50-100 lbs per acre or according to specific crop needs and soil quality.

Derived from: Volcanic Ash
