

Coconut Husk Chips

Coconut Husk Chips

Coconut Husk Chips are perfect for orchids, bromeliads, anthuriums and any other plants that thrive in a bark, sphagnum moss or clay pebble medium. Coconut Husk Chips are an ideal horticultural media that are resistant to rapid breakdown and can provide excellent air and water holding capacity even with extended usage under intensive growing conditions. This 650 gram package will expand to approximately 0.5 cubic feet.

Medium grade chips • Neutral to slightly acidic pH

Encourages rapid root development

Naturally weed and pathogen free

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

INGREDIENT: Coconut Husk

DIRECTIONS FOR USE:

Hydrate compressed Coconut Husk Chips using clean water or a calcium-magnesium solution to buffer CEC to desired levels. Allow to soak overnight, drain and rinse thoroughly before planting directly into or mixing with other media.

BRICK 0.5 cu. ft. / 14.1 L
