### **APPLICATION RATES**

Approximate Conversions 1.5 cups ≈ 1 lb ¼ cup ≈ 2.5 oz 1 Tbsp ≈ 0.5 oz

# **Vegetable Gardens**

& Flower Beds: To prepare new gardens, apply 1-2 lbs per 10 square feet and 1/2-1 lb per cubic yard. thoroughly mix into the top 3" of soil in spring or fall.

For new transplants, add 1-2 tsp per hole, mix into soil

## Containers:

For new plantings, add 1-2 Thsp per gallon of soil and mix thoroughly OR add

For established plants, lightly mix 1-2 tsp per gallon of soil into the soil surface every other month during the growing season.

### Compost:

When adding to finished compost, add 11/2 Thsp per gallon of compost and mix thoroughly. Allow to rest for 1-2 weeks before application to plants, soil, or containers. For larger projects, add 10 lbs per yard of finished compost. For new compost piles, thoroughly incorporate 10 lbs of AZOMITE per yard of fresh (uncomposted) material.

Spread 1 lb per 2" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well.

For grapes, apply 1/2-1 lb around each plant and thoroughly mix into soil. For new trees, prepare transplant hole and mix 4-8 oz with the backfill soil. Use the amended soil to fill in around the new tree and water in well.

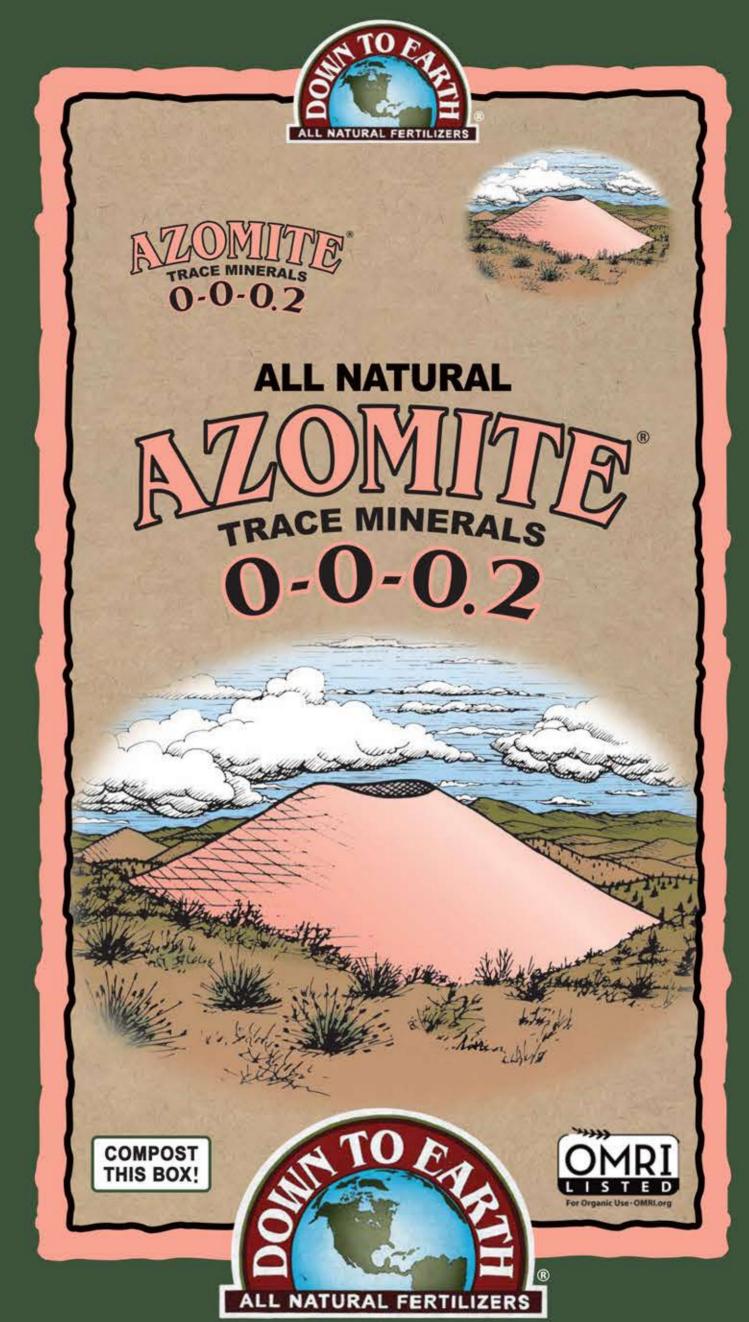

USE OF A DUST MASK IS RECOMMENDED
