6.0% Derived from: Feather Meal, Fish Bone Meal, Alfalfa Meal, Langbeinite, Basalt, Potassium Sulfate, Zinc Sulfate and Kelp Meal

ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S): 2.5% Humic Acids derived from Leonardite Humic Acids may increase micronutrient uptake by plants

Listed by the Organic Materials Review Institute (OMRI) for use in organic production. F002174

APPLICATION RATES

Approximate Conversions 3 cups ≈ 1 lb 1/2 cup ≈ 2.7 oz 1 Tbsp ≈ 0.3 oz

USE OF A DUST MASK IS RECOMMENDED

TOTAL NITROGEN (N)

Citrus Trees:

Most varieties of citrus require fertilization 3-4 times per year with typical applications in late winter (Jan-Feb), late spring (May-June) and early fall (Sept-Oct). Apply 1 cup per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. A liquid or foliar fertilizer may be applied to mature fruit bearing trees throughout the growing season to maximize fruit production.

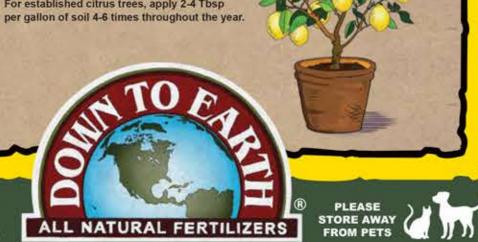

For new trees, prepare transplant hole and mix 1 cup of Citrus Mix with the backfill soil. Use amended soil to fill in around the new tree and water in well. Use half the amount recommended above per application to fertilize 1-2 year

Containers & Houseplants:

For new plantings, mix 1/2 cup per cubic foot of soil and mix thoroughly.

For established citrus trees, apply 2-4 Tbsp
