APPLICATION RATES

Approximate Conversions 2½ cups ≈ 1 lb ¼ cup ≈ 3.2 oz 1 Tbsp ≈ 0.4 oz

Tomatoes:

For new 4" tomato starts, prepare transplant holes and mix 2-3 Tbsp with the backfill soil for each plant. Use amended soil to fill in around the new plant and water in well.

For 1 gallon tomato transplants, use ¼-½ cup per plant.

To feed established tomatoes, side dress ¼-½ cup per plant, depending on plant size and desired growth rate, once each month during the growing season.

Vegetable Gardens & Flower Beds:

To prepare new gardens, apply 2.5-5 lbs per 100 square feet and thoroughly mix into the top 3" of soil.

For new transplants, add 1-2 Tbsp per hole, mix into soil, add transplant, fill in with soil and water in well.

To feed established plants, side dress 2-4 oz, depending on plant size and desired growth rate, once each month during the growing season.

Trees & Shrubs:

Spread 1 lb per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well.

For new trees, prepare transplant hole and mix 1-2 cups with the backfill soil. Use amended soil to fill in around the new tree and water in well.

Containers:

For new plantings, add 1-2 Tbsp per gallon of soil and mix thoroughly OR add 5-10 lbs per cubic yard.

For established plants, lightly mix 1-2 Tbsp per gallon into the soil surface once each month during the growing season.
