about this product

SCAFFCEF MIX is the perfect way to get your delicate young starts and new seedlings in the ground and ready to thrive. In addition to essential primary and secondary plant nutrients, we've added a robust mix of endomycorrhizal fungi. These organisms colonize plant roots and expand into the surrounding soil to greatly increase the absorptive surface area of root systems. Use Starter Mix throughout the growing season when transplanting, preparing seed-starting soil mixes and for container grown flowers, herbs and vegetables.

GUARANTEED ANALYSIS

TOTAL NITROGEN (N) 0.5% Water Soluble Nitrogen 2.5% Water Insoluble Nitrogen

SOLUBLE POTASH (K,O) CALCIUM (Ca) 6.0% MAGNESIUM (Mg)

1.0% 1.0% Water Soluble Magnesium SULFUR (S)

IRON (Fe)

Derived from: Alfalfa Meal, Fish Bone Meal, Langbeinite, Calcium Carbonate, Basalt, Feather Meal and Seaweed Meal ALSO CONTAINS NON-PLANT FOOD

INGREDIENT(S): AVAILABLE PHOSPHATE (P₂O₂) 3.0% 2.5% Humic Acids derived from Leonardite

Endomycorrhizal fungi: Rhizophagus intraradices, Funneliformis mosseae, Claroideoglomus claroideum, Claroideoglomus etunicatum - 1.0 propigm each (1,814 prop/lb total)

2.0% 'Humic Acids may increase micronutrient uptake 0.5% Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

For maximum shelf life, store between 40 and 85° F. Avoid temperatures in excess of 140° F. Product expires two years from production date on bottom of box (Month/Year).

APPLICATION RATES

Down To Earth Starter Mix can be mixed into surrounding soil when seeding and transplanting or blended into potting mixes.

The objective is to ensure physical contact between the roots and the inoculated fertilizer

Note: For use with plant groups that form relationships with Endomycorrhizal fungi.

Approximate Conversions: 3 cups ≈ 1 lb % cup ≈ 2.6 oz 2% Tbsp ≈ 1 oz

Vegetable Gardens & Flower Beds:

To prepare new gardens, apply 14-15 cup per square foot and thoroughly mix into the top 3" of soil. For new transplants, add 1-2 Tbsp per hole, mix into soil and water

For seeding, apply % cup per linear row foot and

For new plantings, add 2 Tbsp per gallon of soil OR 1 cup per cubic foot of soil and mix thoroughly. For established plants, add 2-4 Tosp per gallon of soil
