"Keep on growing!" – Jack

**Transplanting Basics**

**1. Dig**

**2. Feed**

Follow the application rates on the back of the box

**3. Plant**

Fill remaining gaps with soil and press gently to remove air gaps

**4. Water**

Aim to keep the soil damp, not wet, while the plant becomes established

**Acid Mix**  
4-3-6

downtoearthfertilizer.com @downtoearthfertilizers

**Acid Mix** is blended specially for acid soil loving plants like blueberries, rhododendrons, azaleas, hydrangeas, evergreen trees and shrubs, raspberries and other plants that thrive in a low pH soil. Feed in early spring for vegetative growth and again when blooms appear to fuel lush flowers and fruit. Fall applications power root growth and provide potassium for resistance to extreme winter temperature.

**GUARANTEED ANALYSIS**

TOTAL NITROGEN (N)	4.0%	Derived from: Cottonseed Meal, Langbeinite, Fish Bone Meal, Rock Phosphate and Seaweed Meal
0.4% Water Soluble Nitrogen		
3.6% Water Insoluble Nitrogen		
AVAILABLE PHOSPHATE (P <sub>2</sub> O <sub>5</sub> )	3.0%	ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S):
SOLUBLE POTASH (K <sub>2</sub> O)	6.0%	2.5% Humic Acids derived from Leonardite
CALCIUM (Ca)	3.0%	*Humic Acids may increase micronutrient uptake
MAGNESIUM (Mg)	2.0%	F002174
2.0% Water Soluble Magnesium		
SULFUR (S)	2.0%	

Approximate Conversions
2½ cups ≈ 1 lb
½ cup ≈ 3.2 oz
1 Tbsp ≈ 0.4 oz

**APPLICATION RATES**

**Berries:**

To prepare new gardens, apply 2.5-5 lbs per 100 linear feet and thoroughly mix into the top 3" of soil.  
For new berry plants (1-2 years old), prepare transplant hole and mix ½ cup with the backfill soil. Use amended soil to fill in around the new plant and water in well.  
To feed established berries, apply 1 cup per plant in early spring, mix into soil surface and water in well.  
Repeat application when blooms appear and again in fall at half the recommended amount.

**Vegetable Gardens & Flower Beds:**

To prepare new gardens, apply 2.5-5 lbs per 100 square feet and thoroughly mix into the top 3" of soil.  
For new transplants, add 1-2 Tbsp per hole, mix into soil, add transplant, fill in with soil and water in well.  
To feed established plants, side dress 2-4 oz, depending on plant size and desired growth rate, once each month during the growing season.

**Trees & Shrubs:**

Spread 1 lb per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well.  
For new trees, prepare transplant hole and mix 1-2 cups with the backfill soil. Use amended soil to fill in around the new tree and water in well.

**Containers:**

For new plantings, add 1-2 Tbsp per gallon of soil and mix thoroughly OR add 5-10 lbs per cubic yard.  
For established plants, lightly mix 1-2 Tbsp per gallon into the soil surface once each month during the growing season.

USE OF A DUST MASK IS RECOMMENDED
