APPLICATION RATES

Citrus Trees:

Most varieties of citrus require fertilization 3-4 times per year with typical applications in late winter (Jan-Feb), late spring (May-June) and early fall (Sept-Oct). Apply 1 cup per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. A liquid or foliar fertilizer may be applied to mature fruit bearing trees throughout the growing season to maximize fruit production. For new trees, prepare transplant hole and mix 1 cup of Citrus Mix with the backfill soil. Use amended soil to fill in around the new tree and water in well. Use half the

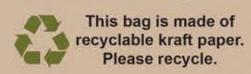

Containers & Houseplants: For new plantings, mix 1/2 cup per cubic foot of

soil and mix thoroughly.

For established citrus trees, apply 2-4 Tbsp per gallon of soil 4-6 times throughout the year.
