

Founded in Eugene, Oregon

Garden Lime

sweetens your soil (raises the pH) to improve plant growth and maximize fertilizer performance. Natural limestone is ground into an ultra-fine powder then prilled into uniform granules for easy spreading. This allows for a rapid reaction time once applied to garden soils and lawns. Lime supplies calcium, an essential nutrient that is required for proper plant growth and development.

GUARANTEED ANALYSIS

CALCIUM (Ca)	34.0%
CALCIUM CARBONATE (CaCO ₃)	86.0%
CALCIUM CARBONATE EQUIVALENT (CCE)	90.0%

SIEVE ANALYSIS

Minimum % passing	
8 Mesh	100.0%
10 Mesh	100.0%
20 Mesh	99.9%
40 Mesh	99.1%
60 Mesh	93.1%
100 Mesh	89.8%

Moisture, Maximum	1.0%
Oregon Lime Score	89

Derived From: Limestone
CA# 1317-65-3

Oklahoma:
EFFECTIVE CALCIUM CARBONATE EQUIVALENT (ECCE) 86.3%

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

Trees, Shrubs & Vines:

For new plants or transplants, prepare planting hole and mix 1 cup with the backfill soil. Use amended soil to fill in around the new plant and water in well.

For established plants, apply 1 cup Garden Lime per 1 inch of trunk diameter evenly to soil outwards towards the drip line. Cover with fresh soil, compost or mulch and water in well.

For soil pH maintenance, test and apply seasonally as needed.

To encourage pink flowers on hydrangeas, soil pH must be 6.5 or higher. Test and apply seasonally as needed.

APPLICATION RATES

2 cups ≈ 1 lb; approximately
10 cups per 5 lb box

To Adjust Soil pH

Current pH	Apply per 100 sq. ft
6.0	3 lbs (6 cups)
5.5	5 lbs (10 cups)
5.0	10 lbs (20 cups)

Most garden plants prefer a soil pH between 6.0 and 7.0. Performing a complete soil analysis or using a soil pH home test kit before application is recommended. If you do not know your soil pH, use the recommended application rates above.

Vegetable Gardens & Flower Beds:

To prepare new gardens, apply 1-1.5 lbs per 100 square feet by evenly distributing over soil surface by hand or spreader.

For soil pH maintenance, test and apply seasonally as needed.

Lawns:

In spring and fall, apply 2.5-5 lbs per 100 square feet and water in well. Results may be enhanced if applied following aeration.

CALCIUM CARBONATE

PRILLED

Garden Lime
CALCIUM CARBONATE

Raises
Soil pH

COMPOST
THIS BOX!

NET WT 5 LB (2.27 kg)

"Keep on growing!" - Jack

Garden Lime
CALCIUM CARBONATE

Applying to
Established Plants

1. Feed

Follow the application rates
on the back of the box

Sprinkle from the base of the
plant out toward the drip line

2. Rake

Lightly scratch into
soil surface

3. Cover and Water

Lightly cover with compost or mulch
and saturate the area well

USE OF A DUST
MASK IS
RECOMMENDED
