# ALL NATURAL POTTING SOIL

## Plus Mycorrhizal Fungi

Our blend of premium all natural ingredients makes Down To Earth All Natural Potting Soil an excellent all purpose mix for seed starting, transplanting or container gardening. It's ideal for vegetables, flowers, houseplants and trees in indoor and outdoor containers, hanging baskets or planter boxes. It is also recommended for amending garden soils or for preparing raised beds.

This Aged Pacific Northwest Bark, Coconut Coir Fiber and Vermicompost based soil is professionally formulated to optimize aeration, provide increased drainage and a superior texture that is ideal for the developing root systems of all plants. Enhanced with Mycorrhizal Fungi that colonize plant roots and expand into the surrounding soil, greatly increasing the absorptive surface area of root systems.

### DIRECTIONS FOR USE

- This potting soil is ready to use right from the bag. Select the appropriate size container for your plant and add 2-3 inches of fresh potting soil.
- Gently remove the plant from its current pot and carefully untangle any existing roots.
- Place the plant in the new container and add soil to completely cover the root system up to the base of the stem.
- Lightly tamp down the soil to remove any air pockets and secure the plant. Water thoroughly and allow the excess water to drain out the bottom of the pot.
- Most plants will benefit from a regular feeding schedule and consistent watering practices. Take pleasure in your plants and be sure to water when the soil feels dry to the touch.

To ensure consistent performance, please remember to tightly close the bag after each use.

SOIL AMENDING INGREDIENTS:  
Bark, Coir Fiber, Perlite, Vermicompost, Diatomite.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S):  
Mycorrhizal Inoculant (Glomus intraradices 0.016 prop/gm, Glomus mosseae 0.017 prop/gm, Glomus aggregatum 0.018 prop/gm, Glomus etunicatum 0.02 prop/gm, Pisolithus tinctorius 280 prop/gm, Rhizopogon villosulus 8 prop/gm, Rhizopogon luteolus 8 prop/gm, Rhizopogon amylopogon 8 prop/gm, Rhizopogon fulvigleba 8 prop/gm, Scleroderma citrinum 17 prop/gm, Scleroderma cepa 17 prop/gm)

For maximum shelf life, store between 40 and 85° F. Avoid temperatures in excess of 140° F. Product expires two years from production date. Product expiration date is imprinted on top of bag (EXP: MM-DD-YY).

### RECYCLE THIS BAG!

We utilize a 100% recyclable #4 LDPE Low Density Polyethylene bag and encourage everyone to recycle this and other plastics to keep them out of landfills. As much as 25% of landfill waste is recyclable plastics that could be recovered to reduce our consumption of virgin materials and lessen our environmental impact.

Once you've emptied the bag, give it a thorough rinse and if necessary, separate from your other plastics appropriately. Consolidate with other #4 plastic packaging (LDPE is commonly used for bread bags, produce bags and food wrap) and contact your local community recycling center.

Through recycling we can protect the environment by decreasing pollution and conserving energy and natural resources. Reduce, Reuse, Recycle!

Caution: Do not swallow. Avoid creating dust. Avoid contact with eyes, open sores, or cuts. Wash exposed skin thoroughly after use. Keep out of reach of children and pets.
