

**GUARANTEED ANALYSIS**

Total Nitrogen (N) 4.0%  
3.5% Water Soluble Nitrogen  
0.5% Water Insoluble Nitrogen  
Available Phosphate (P<sub>2</sub>O<sub>5</sub>) 1.0%  
Soluble Potash (K<sub>2</sub>O) 3.0%

**Derived from:** Fish Protein Hydrolysate, Soy Protein Hydrolysate, Lysine, Potassium Sulfate, Kelp (*Ascophyllum nodosum*), and Potassium Hydroxide.

**PRODUCT INFORMATION**

**Down To Earth Liquid All Purpose** is designed to promote increased shoot, flower, fruit and root development in all types of plants including flowers, fruits, herbs, ornamentals and vegetables. This easy to use concentrated liquid formula provides primary nutrients needed for growth of sturdy plant tissues, stems and roots. Use Liquid All Purpose throughout the growing season to support the natural progression of plant development for vigorous growth, abundant fruits and a bountiful harvest.

**DIRECTIONS FOR USE**

*Shake Well Before Using*

**DTE Liquid All Purpose** is most effective as a soil drench and is designed for plants grown in garden soils, potting soils or soilless media. Filtered to 595 microns (can pass 30 mesh screen) for easy application. Check equipment manufacturer's specifications for particle size and compatibility requirements.

**Soil Drench:** Use ½ - ¾ cup (4-6 oz) per gallon of water **OR** 2-5 gallons per acre. Apply around the base of plants, at the drip line of trees or through an irrigation system. Begin applications when planting, transplanting or anytime during active root development. Repeat application twice monthly or as needed.

**Foliar Spray:** Use 2 Tbsp (1 oz) per gallon of water **OR** 1-2 gallons per acre. For best results, combine with a natural surfactant to increase adhesion to the leaf surface. Spray foliage to the point of run-off starting at the 4-leaf stage for vegetables and flowers. Repeat application weekly or as needed.

**Containers:** Use 2-4 Tbsp (1-2 oz) per gallon of water depending on size of plant and growth pattern desired. For rapid growing plants, use stronger rate. Repeat application with each watering or as needed.

**Acreage:** For a seasonal total of 20-40 gallons per acre (gpa) use a combination of the following methods:

	Field/Row Crops (gpa)	Tree/Vine Crops (gpa)
Broadcast	10-20	15-20
Water Run/Sprinkler	10-15	10-20
Micro-Irrigation	5-10	5-15
Under Seed	5	—
Side Dress	10-15	10-15
